WORK EXPERIENCE

PERN Stack Developer — *Stibium Tech Pvt. Ltd.*

Sep 2025 – Present

- Design and build backend logic and REST APIs for production applications using Express.js and PostgreSQL, owning schema design and debugging edge cases across the data layer.
- Build and debug reusable frontend modules and integrate REST APIs for MentEdge, taking end-to-end ownership of features.

IT Intern — *Vrindavan Chandrodaya Mandir*

Jul 2026 – Present

- Own the Super Admin module end-to-end as module lead — designing the PostgreSQL schema, ER diagrams, and backend logic, and debugging issues across the stack.
- Collaborate with a cross-functional team of interns using Git and GitHub, participating in system design discussions for the wider portal.

AI Intern — *Infosys Springboard Internship 6.0*

Nov 2025 – Jan 2026

- Built and debugged QueryTube end-to-end, an AI-powered application connecting embeddings-based semantic search and a vector database to real-time query and summarization features.

Frontend Developer Intern — *Serene Minds*

Jul 2024 – Oct 2024

- Developed and tested responsive React components using Mantine UI, ensuring cross-platform compatibility and complete mobile responsiveness.

PROJECTS

QueryTube — [GitHub](#)

- Built the transcript ingestion pipeline and semantic search system from scratch using embeddings and a vector database, debugging edge cases across real-world, messy data.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline connecting model output to real-time, query-based summarization.

CareerPilot — **AI Career & Job Matching Agent** — [Live Site](#)

- Built an AI-powered career agent (Python, Streamlit, Groq/Llama) that analyzes resume-to-job-description fit and returns a transparent, weighted match score.
- Designed a multi-stage pipeline generating skill-gap analysis, application recommendations, a 7-day preparation plan, and job-specific interview questions.
- Implemented structured JSON prompting with defensive parsing and grounding rules to prevent hallucinated skills, keeping API usage to 1–4 calls per session.

MentEdge Platform — mentedge.com

- Developed scalable REST APIs and React frontend modules using the PERN stack for production dashboards powering mentorship and internship management workflows.

DSA Revision with RAG (Love Babbar Playlist) — *Ongoing*

- Building a Retrieval-Augmented Generation tool over the Love Babbar DSA playlist to enable topic-wise concept lookup and quick revision for interview preparation.
